SUMMARY

I'm a mobile app developer at Audible, Inc., an Amazon company that serves audiobook-loving customers worldwide. I enjoy working with my team in our fast-paced work environment, where I always go all-in on everything I do, whether it's fixing a bug or taking ownership of a whole new feature.

EXPERIENCE

Audible, Inc. — *Android & Fire OS Mobile App Developer*

JULY 2019 TO PRESENT

- My daily responsibilities include developing new features and resolving customer-impacting issues.
- I have technical experience and expertise with using Java, Kotlin, and Android framework and multiple areas of application development, such as the MVP architecture pattern.
- I take technical leadership and ownership for development and delivery of component designs, development, and maintenance.

Audible, Inc. — *Software Development Engineer Intern*

MAY 2018 TO AUGUST 2018

- I implemented backend and frontend logic for a returned book indicator feature available to Audible Escape customers on product detail pages as an intern on the Audible Escape team.

Pivotal, Inc. — *Software Engineer Intern*

JUNE 2017 TO AUGUST 2017

- I performed quality assurance tasks and resolved production issues as an intern on the GemFire & Apache Geode team and participated in an Agile development workshop.

EDUCATION

Franklin W. Olin College of Engineering — *B.S. in Engineering with a Concentration in Computing*

AUGUST 2015 TO MAY 2019 — 3.92 GPA
